School Kid's Train, modelled by Arthur Hayes

This afternoon the "Scooter" is working the school kids train from Westgate.

A great little train to model, we will more to say about this working in our presentation at the MRQC Convention in September.

As similar train with that name ran on the NCL (North Coast Line) between Landsborough and Nambour in the mornings and again from Nambour to Eumundi in the afternoon. The other leg of the trip was empty cars.

The carriage set was stowed at Yandina overnight and weekends. During the day it was stowed at Nambour. The loco came off the overnight shunt from Mayne and returned back to Clapham/Mayne later in the afternoon on the south bound shunt.
